

**survival steps remaining (death-ended episodes) blocked by gate G6**

BLOCKED by gate G6: 150 held-out episode groups in the smallest split repeat, the rules need at least 500. No  $R^2$  is shown, because the rules decide nothing from it.

- ordinary agent (one line per seed)
- modulated agent (one line per seed)
- clock baseline (time step alone)
- ordinary seed range
- modulated seed range
