

survival steps remaining (death-ended episodes) blocked by gate G6

BLOCKED by gate G6: 150 held-out episode groups in the smallest split repeat, the rules need at least 500. No R^2 is shown, because the rules decide nothing from it.

- ordinary agent (one line per seed)
- modulated agent (one line per seed)
- clock baseline (time step alone)
- raw network input
- ordinary seed range
- modulated seed range

evidence status: evidence; verdict words come only from decision_rules.evaluate_*
