

Job ledger: one small file per job

step	agent	status	evidence
plan	senior-developer	done	plan.md
review	plan-reviewer	done	verdict: SOUND
approve	you	done	approval line
implement	developer	running	session 7f3a
verify	senior-developer	waiting	-

read

Session ends mid-job

a crash, a compaction,
or a closed laptop

New session starts

reads the ledger first

Resumes at implement

after checking session
7f3a is gone

the Launch Manifest already does this for training runs
