

survival steps remaining (death-ended episodes)
provisional — end of stage 1 of 5: blocked by gate G6

BLOCKED by gate G6: 210 held-out episode groups in the smallest split repeat, the rules need at least 500. No R^2 is shown, because the rules decide nothing from it.

- ordinary agent (one line per seed)
- modulated agent (one line per seed)
- clock baseline (time step alone)
- ordinary seed range
- modulated seed range
- ◆ raw network input

evidence status: interim — every verdict word carries the prefix "provisional — end of stage 1 of 5"; verdict words come only from `decision_rules.evaluate_*`
 decision rules sha256 4c8508af14b6 @ 872b0e04 — computed under the rules before the 2026-09-30 revision (P1_rare_predictor_columns, P2_predictivity_gain_invariance_wording); reported with that sha, as the revision requires. The current rules file is 5ef6f731d15e.
 Each panel has its own vertical range. Held-out = scored on episodes the readout never saw (grouped by episode_seed).
