

enc.out: provisional — end of stage 1 of 5: (c) different processing, same outcome (same-seed excess E does not hold)

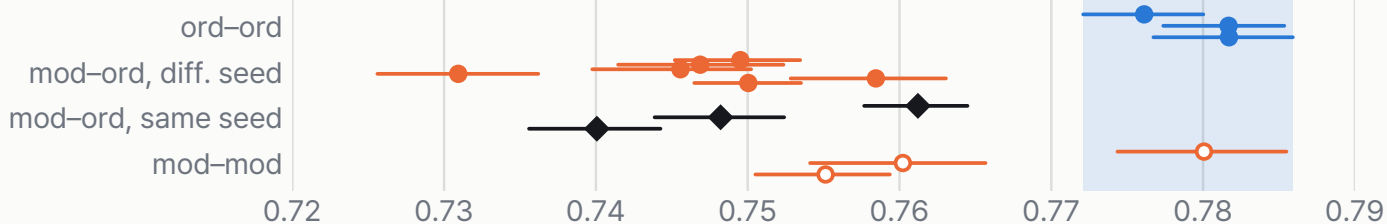

rnn.state: provisional — end of stage 1 of 5: (c) different processing, same outcome (same-seed excess E does not hold)

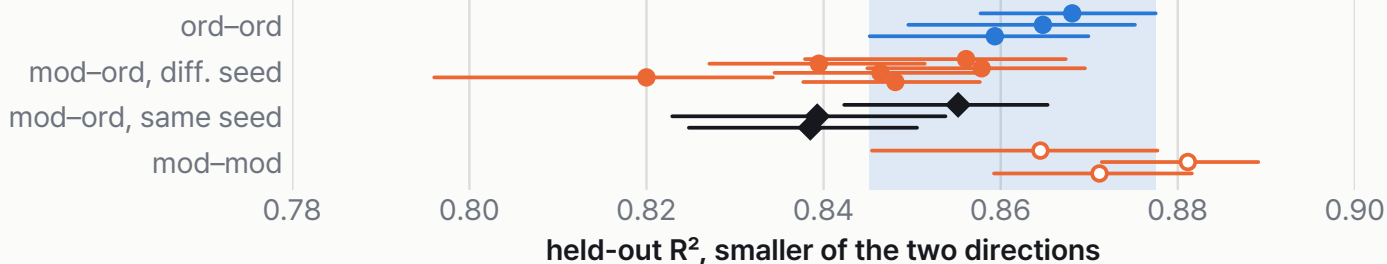

rnn.out: provisional — end of stage 1 of 5: (c) different processing, same outcome (same-seed excess E does not hold)

actor.out: provisional — end of stage 1 of 5: (c) different processing, same outcome (same-seed excess E does not hold)

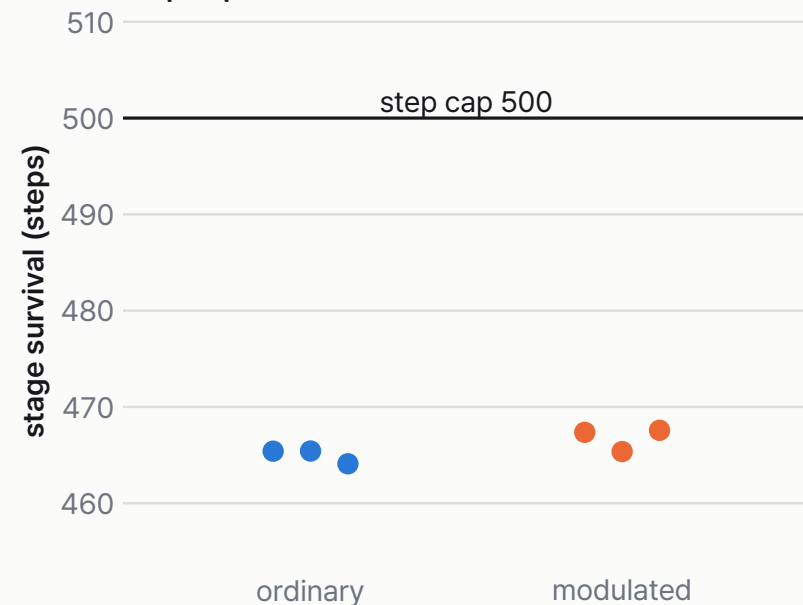

critic.out: provisional — end of stage 1 of 5: none of the three patterns (undetermined at 3 seeds) (same-seed excess E does not hold)

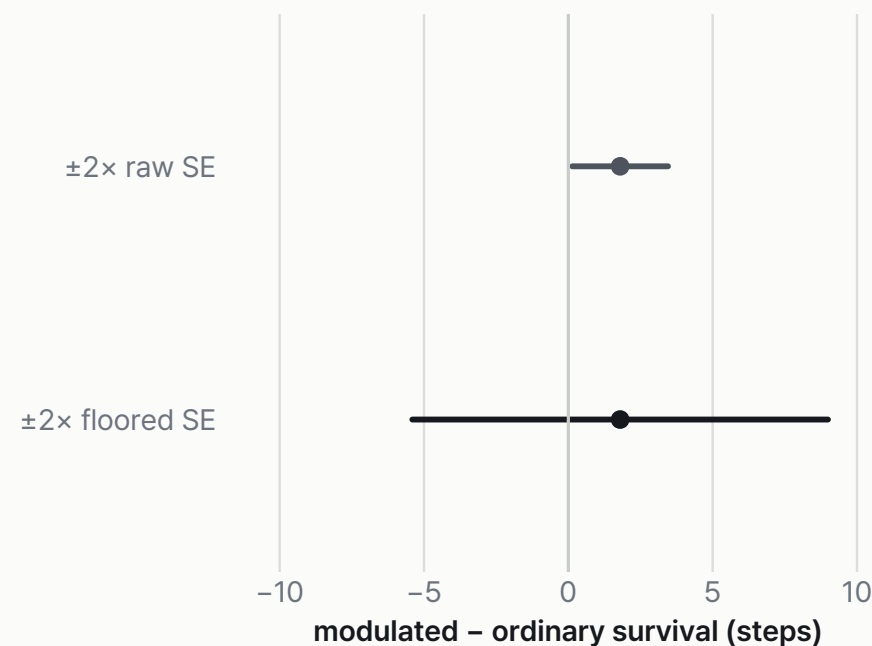

held-out R^2 , smaller of the two directions

92 % of the probe's episodes reach the step cap

difference +1.79 steps; raw SE 0.83, floored SE 3.60

ordinary-ordinary band [L, U]

ordinary-ordinary pair / ordinary run

modulated-ordinary, different seeds / modulated run

modulated-ordinary, same seed

modulated-modulated pair

evidence status: interim — every verdict word carries the prefix "provisional — end of stage 1 of 5"; verdict words come only from decision_rules.evaluate_*

decision rules sha256 4c8508af14b6 @ 872b0e04 — computed under the rules before the 2026-09-30 revision (P1_rare_predictor_columns, P2_predictivity_gain_invariance_wording); reported with that sha, as the revision requires. The current rules file is 5ef6f731d15e.

Left panels each have their own horizontal range: compare positions within a panel.
